DEAL TERMS

*The compensation is undetermined because the compensation to be received (e.g., stock, cash, escrow notes, other) will be determined at later date, potentially at the option of the Fund's investment adviser.

¹Per prospectus dated May 1, 2018.

The total annual operating expense ratio of the Funds Investor class shares was 1.92%. The Advisor has contractually agreed to waive a portion of its management fee until April 30th, 2019 if its assets exceed certain thresholds, beginning at \$2 billion. Total annual operating expenses after fee waiver of the Fund's Investor Class shares of 1.91% were applicable to investors. After applicable fee waivers and before certain investment-related expenses (including acquired fund fees and expenses of 0.05% and short interest and dividend expenses of 0.37%), total annual operating expenses of the Fund's Investor Class

Performance for MERFX is used. Performance data quoted represents past performance; past performance does not guarantee future results. The performance results portrayed herein reflect the reinvestment of all interest, dividends and distributions. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling (800) 343-8959 or by visiting www.westchestercapitalfunds.com.

PERFORMANCE SUMMARY
Cumulative Change in Value of a \$2,000 Investment

This chart illustrates the performance of a hypothetical \$2,000 investment over 15 years. It assumes reinvestment of dividends and capital gains, but does not reflect the effect of any applicable sales charge or redemption fees. This chart does not imply any future performance.

Performance data quoted represents past performance; past performance does not guarantee future results. The performance results portrayed herein reflect the reinvestment of all interest, dividends and distributions. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling (800) 343-8959 or by visiting www.westchestercapitalfunds.com.

Before investing in The Merger Fund, carefully consider its investment objectives, risks, charges and expenses. For a prospectus or summary prospectus containing this and other information, please call (800) 343-8959 or view it online at www.westchestercapitalfunds.com. Please read it carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. Merger arbitrage and event driven investing involves the risk that the adviser's evaluation of the outcome of a proposed event, whether it be a merger, reorganization, regulatory issue or other event, will prove incorrect and that the Fund's return on the investment will be negative. Investments in foreign companies may entail political, cultural, regulatory, legal, and tax risks different from those associated with comparable transactions in the United States. The frequency of the Fund's transactions will vary from year to year, though merger arbitrage portfolios typically have higher turnover rates than portfolios of typical long only funds. Increased portfolio turnover may result in higher brokerage commissions, dealer mark ups and other transaction costs. The higher costs associated with increased portfolio turnover may offset gains in the Fund's performance. The Fund may enter into short sale transactions for, among other reasons, purposes of protecting against a decline in the market value of the acquiring company's shares prior to the acquisition completion. If the price of a security sold short increases between the time of the short sale and the time the Fund covers its short position, the Fund will incur a loss. The amount of a potential loss on an uncovered short sale transaction is theoretically unlimited. Debt securities may fluctuate in value due to, among other things, changes in interest rates, general economic conditions, industry fundamentals, market sentiment and the financial condition of the issuer, including the issuer's credit rating or financial performance. Derivatives may create leverage which will amplify the effect of the performance of those instruments on the Fund and may produce significant losses. The Fund's hedging strategy will be subject to the Fund's investment adviser's ability to assess correctly the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged.

Definitions: **The ICE BofAML US 3M Treasury Bill TR Index** is comprised of a single issue purchased at the beginning of the month and held for a full month; **The Wilshire Liquid Alternative Event Driven Index** measures the performance of the event driven strategy component of the Wilshire Liquid Alternative Index. Event driven strategies predominantly invest in companies involved in corporate transactions such as mergers, restructuring, distressed, buy backs, or other capital structure changes. **The US Fund Market Neutral Index** attempts to eliminate the risks of the market by holding 50% of assets in long positions in stocks and 50% of assets in short positions. Funds in this group match the characteristics of their long and short portfolios, keeping factors such as P/E ratios and industry exposure similar. Stock picking, rather than broad market moves, should drive a market-neutral fund's performance. It is not possible to Invest directly in an Index.
